

PORTABLE STORAGE BUNDING

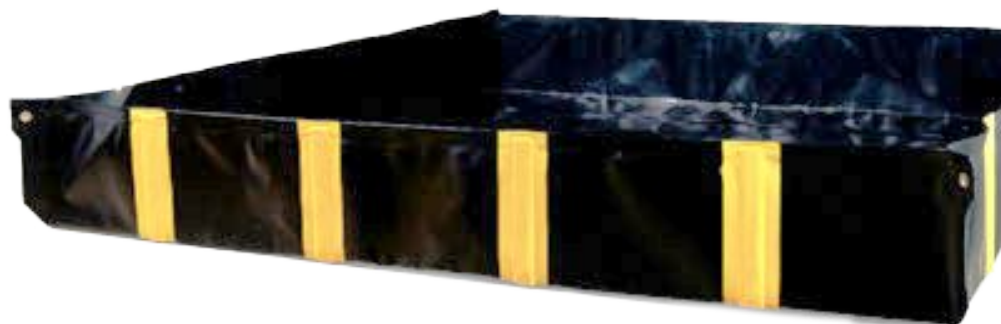

Portable Bunding – Relocatable watertight bunds.

Our Portable Storage Bunds create permanent or temporary relocatable watertight bunds that can be manufactured to suit your site requirements.

Portable bunding is durable and easily folds away within minutes.

All our portable bunding is chemical, oil and fuel resistant. Our portable bunds can be easily folded down or up. The Construction is Heavy Duty 900 GSM PVC, with options available for Superior Heavy Duty as required.

A portable bund's best feature is that you easily can get it installed wherever you need it – and quickly. That means that the product can be tightly packed and stored until there is a need to use it.

Portable Bunding products
designed to hold 110% capacity.
Our Portable Bund Systems meet
Australian Standards and keep your
workplace compliant.

CODE	DESCRIPTION	HEIGHT	CAPACITY	PVC OPTIONS
TEPSB13	1.3 x 1.3	300mm	507L	Standard/HD

TEPSB36	3.6 x 3.6	300mm	3888L	Standard/HD
TEPSB15x6	15 x 6	300mm	27,000L	HD

-  Installing or removing our bunds is an easy job that takes minutes not hours.
-  We can manufacture to size according to your requirements.
-  All our PSB's are a standard heavy duty construction.
-  can be folded and packed very compactly, which means they can be easily moved around.
-  Proudly manufactured in Australia and designed for the Australian conditions
-  If required we supply protective ground sheets for harsh terrain so you can place it down under your PSB to minimise damage
